Ingersoll-Rand UP6-7.5TAS-125-80-230-1, 7.5 HP Ingersoll-Rand Rotary Screw Air Compressor 25 CFM @ 125 PSI, Air Dryer and 80 Gallon Tank 230-Volt 1-Phase

5-15HP Rotary Compressors—"Low Sound"

UP- Series 5-15 HP "Total Air System"—Looking to save space and installation costs? Consider the Small UP 5-15 HP "Total Air System" (TAS) packages as an innovative solution for your customer's needs. TAS packages come standard with "Energy Star" cycling refrigerated air dryer with stainless steel heat exchanger, integrated compressor and dryer controls for optimum operation, panel mounted dew point indicator, dual filters (both pre and after) mounted and piped, single point condensate drain system with electric drain (115-volt), and high efficiency moisture separator.

Integral Air Treatment

Dual Filtration Pack

Clean Air to Drive Productivity

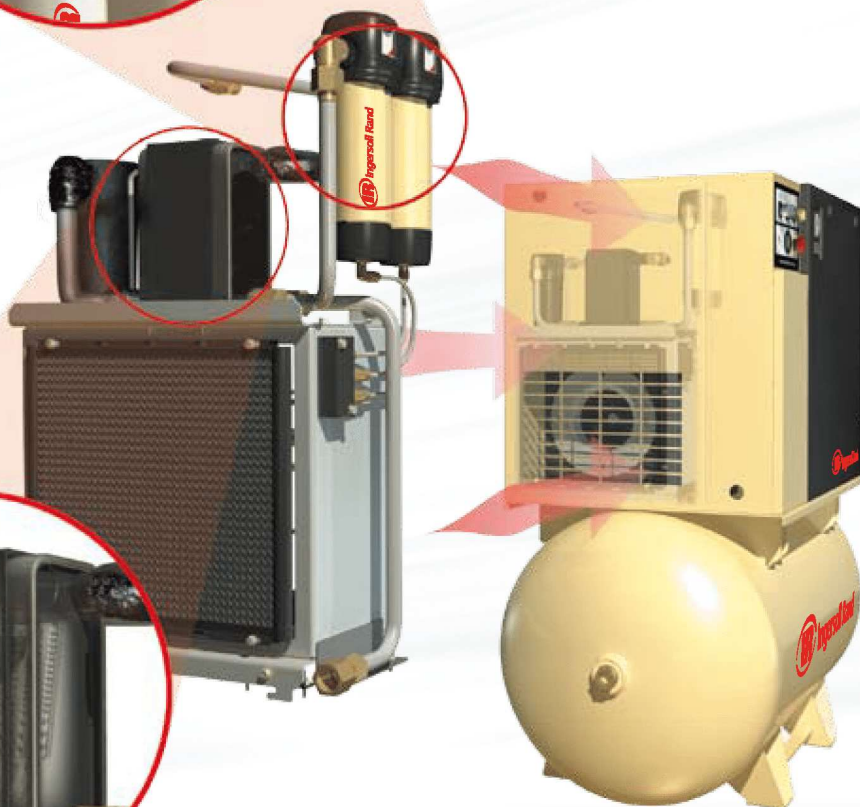

- Two stages of filtration deliver best performance, reduce pressure losses and extend operating life.
- Particulate removal to industry leading 1 micron.
- Oil removal down to 0.01 micron.
- Longer element life, lower pressure drop.
- Better air quality delivered to tools and equipment results in longer life.

Energy-Savings Refrigerated Air Dryer

Dry Air to Drive Productivity

- Cycling dryer—automatically shuts off with the compressor, saving energy compared to traditional dryers which run continuously.
- Stainless steel braised heat exchanger for low losses, high thermal efficiency and long service life.
- Solenoid drain valve and high efficiency moisture separator to permanently discharge condensate.
- Eliminates corrosion of piping, a cause of premature wear of tools and seals.

Boost Your Profitability

Boosting your company's profits was the main goal that Ingersoll Rand had in mind when it designed the revolutionary UP-Series line of integrated rotary screw air solutions.

The UP-Series is more than an integrated air system, it's a complete air solution designed to maximize the key drivers of profitability in today's business:

- Ultimate reliability
- Shop productivity
- Flexibility of operation
- Energy efficiency and savings

Welcome to Ingersoll Rand's
UP-Series Rotary Air Solutions, a
New Standard of Performance.

Achieve Highest Productivity and Lowest Total Cost of Ownership

Exceptional Value

Ultimate Reliability

70% Fewer Connections

Smart integration eliminates leaks and pressure drops maximizing reliability.

Ultimate Flexibility

Compact Footprint Design

Small footprint frees up valuable floor space and reduces installation costs.

Installation Close to Point-of-Use

Whisper quiet operation allows for installation closer to point-of-use, reducing costs and ensuring a better and safer work environment.

Innovation

High Efficiency Integrated Compression Module

- To provide maximum performance, efficiency and ease of service, the airend, interconnecting piping and separation system have all been integrated into one simple design. Integration of the compression module eliminates leaks and pressure losses to increase efficiency and performance.
- Service and maintenance are made extremely easy through spin-on oil and separator cartridges.

Ultimate Productivity

Closely Maintained Pressure

Closely maintained discharge pressure avoids excessive pressure bands and increases downstream tool and equipment life.

Real World Advantages

Whisper Quiet Operation

Oversized, high efficiency motor mount blower. Sound levels as low as 65 dBA.

Poly-V Belt Drive

Premium drive system to minimize belt stretching and increase air output.

Dual Control Operation

Auto start/stop operation with constant speed control for maximum flexibility.

Advanced Cooling

High efficiency, oversized combination cooler with roof mount discharge for ease of ducting.

Generous Serviceability

Spacious design for ease of serviceability.

Asset protection

Leading Warranty as Standard

- 1 Year Warranty Protection

- AirCare Extended Coverage

In addition to the standard package warranty,

all UP-Series compressors are available for

extended AirCare coverage. Ask your

Ultra-Plus Coolant

All units come standard with Ingersoll Rand's Ultra-Plus advanced synthetic coolant:

- 9,000 hour extended coolant life

Simple condensation separation

Compressor World is supported by a team of Compressed Air Experts; led by Matt Mazanec, Steve Bergamesca and Matt Murphy. The Compressor World team specializes in selling industrial piston and rotary screw compressors, as well as vacuum pumps and all related compressed air accessories

CUSTOMERS FEEL CONFIDENT BUYING EQUIPMENT FROM US

BECAUSE OUR EXPERTS HELP YOU:

- ☒ MAKE EDUCATED DECISIONS!
- ☒ SAVE MONEY!
- ☒ SAVE TIME!
- ☒ GET THE EQUIPMENT FAST

Compressor World takes pride in quick shipments. We have teamed with some of the best compressed air supplier and are able to ship direct from these factory stores, as well as from our 20,000 sq. ft. facility where we stock hundreds of machines.

Matt Mazanec

Step 1 - Confirmation

We contact every customer to confirm their purchase fits their application. Our staff will confirm the voltage, operation pressure and installation tips.

Step 2 - Shipping & Tracking

Once the order has shipped, our shipping department will notify you with the tracking information, estimated delivery date and how to receive the equipment.

Step 3 - Warranty

Our team will also send a service packet which contains information about your local warranty & service center(s).

MULTIPLE BRANDS

Over 25 compressor brands to pick from

MONEY BACK GUARANTEE

Our experts guarantee satisfaction 100% money back guarantee

LOCAL FACTORY SUPPORT

Local service and support on all machines, any location

FINANCING AVAILABLE

Low Interest Rates Available on various brands

EXPRESS DELIVERY

Same day shipping available for In-stock Compressors
